

Programming Assignment

What you need to do:

- **Employee** class: In `raiseSalary()` method, salary plus raise amount by percent.
- Create a class called **Manager** that derived from class **Employee**. Add a new field to store the bonus, and new method to set it. Override the `getSalary()` method. This method should return the sum of the base salary plus the bonus.
- Create a class called **Main** and do the following.
 - a) construct one Manager object and two employee objects
 - b) fill the staff array with Manager and Employee objects
 - c) print out information about all Employee objects.

```
name= Bob ,salary=85000.0
name= Harry ,salary=50000.0
name= Steve ,salary=40000.0
```
